## **8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

### **A. Exposure limits**

- o ACGIH TLV
  - [Rosin] : SEN

### **B. Engineering controls**

- A system of local and/or general exhaust is recommended to keep employee exposures above the Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. The use of local exhaust ventilation is recommended to control emissions near the source.

### **C. Individual protection measures, such as personal protective equipment**

- o **Respiratory protection**
  - Under conditions of frequent use or heavy exposure, Respiratory protection may be needed.
  - Respiratory protection is ranked in order from minimum to maximum.
  - Consider warning properties before use.
